- English

About Me

Passionate and versatile Software Engineer skilled in React, Full Stack Development, mobile app development, and UI/UX design. Experienced in building innovative, user-friendly, and scalable digital solutions that combine functionality with intuitive design. Proficient in React, React Native, and backend integration, delivering responsive, cross-platform applications that enhance user engagement. With a strong focus on user-centered design and continuous learning, I strive to bridge the gap between technology and user experience to create impactful products.

Completed Projects

Challenge Front-end Project
Created a responsive mobile viso challenge challenge web page using react bootstrap and cascading style sheet

Mobile Web Page for Local Business
Created a responsive mobile web page using React.js and Node.js for a local business to boost online presence and track stocks and sales via printed bills.

Photographer Website
Developed a web-based sales management system using PHP with CRUD, inventory updates, and sales tracking.

Sales Management System
Developed a web-based sales management system using PHP with CRUD, inventory updates, and sales tracking.

Cloth shop store
An ongoing e-commerce project for clothing items, designed with a modern UI and dynamic product management.
